Notes to the Condensed Interim Consolidated Financial Statements

For the nine months ended July 31, 2023

(Unaudited – prepared by management)

1. NATURE OF OPERATIONS AND CONTINUANCE OF OPERATIONS

Commerce Resources Corp. (“Commerce” or the “Company”) was incorporated on May 19, 1999, under the Company Act of British Columbia and is in the business of acquiring, exploring, developing and evaluating mineral resource properties, and either joint venturing or developing these properties further or disposing of them when the evaluation is completed. The Company is in the exploration stage and has interests in properties located in British Columbia (“BC”) and Quebec, Canada. Commerce is a public company listed on Tier 1 of the TSX Venture Exchange in Canada (“CCE”), the Frankfurt Stock Exchange in Germany (“D7H”), and the OTCQX (“CMFZF”). The head office, principal address and registered and records office of the Company are located at 1450 – 789 West Pender, Vancouver, BC, Canada, V6C 1H2.

On July 12, 2023, the Company incorporated Capacitor Metals Corp., a British Columbia company which is a wholly-owned subsidiary of the Company.

These consolidated financial statements were authorized for issue by the Audit Committee and Board of Directors on September 11, 2023.

The Company has no source of operating cash flows, has not yet achieved profitable operations, has a working capital deficit of \$356,614 at July 31, 2023 (October 31, 2022 - \$346,311 surplus), has accumulated losses since its inception, expects to incur further losses in the development of its business, and has no assurance that sufficient funding will be available to conduct further exploration of its mineral properties. These material uncertainties cast significant doubt about the Company’s ability to continue as a going concern and, accordingly, the appropriateness of the use of generally accepted accounting principles applicable to a going concern. In recognition of these circumstances, management is pursuing various financial alternatives to fund the Company’s exploration and development programs. There is no assurance that these initiatives will be successful.

In the future, the Company may raise additional financing through the issuance of share capital or shareholder loans; however, there can be no assurance that it will be successful in its efforts to do so and that the terms will be favourable to the Company. These financial statements do not include any adjustments to the carrying values of assets and liabilities, the reported expenses and statement of financial position classifications that might be necessary should the Company be unable to realize its assets and settle its liabilities as a going concern in the normal course of operations. Management is actively seeking to raise the necessary capital to meet its funding requirements and has undertaken available cost-cutting measures. There can be no assurance that management’s plan will be successful. If the going concern assumption were not appropriate for these financial statements, then adjustments would be necessary in the carrying value of assets and liabilities, the reported expenses and the statement of financial position classifications used. Such adjustments could be material.

The business of mining and exploration involves a high degree of risk and there can be no assurance that current exploration programs will result in profitable mining operations. The Company has no source of revenue, and has significant cash requirements to meet its administrative overhead and maintain its mineral interests.

2. BASIS OF PRESENTATION

Statement of Compliance

These condensed interim statements are prepared in accordance with International Financial Reporting Standards (“IFRS”), as issued by the International Accounting Standards Board (“IASB”), applicable to the presentation of interim financial statements, including IAS 34, Interim Financial Reporting.

2. BASIS OF PRESENTATION - continued

Basis of Measurement and Consolidation

The consolidated financial statements have been prepared on the historical cost basis, except for cash equivalents which are reflected at fair value as set out in the accounting policies below. In addition, these consolidated financial statements have been prepared using the accrual basis of accounting except for cash flow information.

The consolidated financial statements include the financial statements of the Company, its wholly owned subsidiary Capacitor Metals Corp.. Subsidiaries consist of entities over which the Company is exposed to, or has rights to, variable returns as well as the ability to affect those returns through the power to direct the relevant activities of the entity. Subsidiaries are fully consolidated from the date control is transferred to the Company and are de-consolidated from the date control ceases. The consolidated financial statements include all the assets, liabilities, revenues, expenses and cash flows of the Company and its subsidiaries after eliminating inter-entity balances and transactions.

3. SIGNIFICANT ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS

Estimates and assumptions

In particular, information about significant areas of estimation uncertainty considered by management in preparing the financial statements includes:

- The recoverability of the carrying value of the exploration and evaluation assets is dependent on successful development and commercial exploitation, or alternatively, sale of the respective areas of interest;
- The inputs used in assessing the recoverability of deferred income tax assets to the extent that the deductible temporary differences will reverse in the foreseeable future and that the Company will have future taxable income;
- Management's assumption that there are currently no decommissioning liabilities is based on the facts and circumstances that have existed during the periods; and
- The fair value of share-based compensation is determined using the Black-Scholes option pricing model. Estimating fair value requires determining the most appropriate valuation model for a grant of equity instruments, which is dependent on the terms and conditions of the grant. Option-pricing models require the use of highly subjective estimates and assumptions including the expected stock price volatility. Changes in the underlying assumptions can materially affect the fair value estimates and, therefore, existing models do not necessarily provide reliable measurement of the fair value of the Company's stock options
- The incremental rate of borrowing used in the measurement of the lease liability was based on the interest rate of other junior mining companies' borrowing rate.

Judgments

The critical judgments that the Company's management has made in the process of applying the Company's accounting policies from those involving estimations that have the most significant effect on the amounts recognized in the Company's financial statements are as follows:

- Economic recoverability and probability of future economic benefits of exploration, evaluation and development costs
Management has determined that exploratory drilling, evaluation, development and related costs incurred which have been capitalized are economically recoverable. Management uses several criteria in its

Judgments – continued

assessments of economic recoverability and probability of future economic benefit including geologic information, scoping and feasibility studies, accessible facilities, existing permits and life of mine plans.

- Production stage of a mine
The determination of the date on which a mine enters the production stage is a significant judgment since capitalization of certain costs ceases upon entering production.
- Provisions for reclamation
Management assesses its provision for reclamation on an annual basis or when new information becomes available. This assessment includes the estimation of the future rehabilitation costs, the timing of these expenditures, and the impact of changes in discount rates. The actual future expenditures may differ from the amounts currently provided if the estimates made are significantly different than actual results or if there are significant changes in environmental and/or regulatory requirements in the future.
- Going concern
The assessment of the Company's ability to continue as a going concern involves judgment regarding future funding available for its exploration projects and working capital requirements.

4. SIGNIFICANT ACCOUNTING POLICIES

The policies applied in these condensed interim consolidated financial statements are consistent with policies disclosed in Note 4 of the financial statements for the year ended October 31, 2022 and therefore should be read in conjunction with the Company's audited financial statements for the year ended October 31, 2022.

5. SHORT-TERM INVESTMENTS

At July 31, 2023, the Company had a guaranteed investment certificate ("GIC's") valued at \$23,000 (October 31, 2022: \$23,000) with an interest rate of prime less 2.7% (October 31, 2022: 2.7%) and a maturity date of October 26, 2023 (October 31, 2022: October 27, 2022).

7. EXPLORATION AND EVALUATION ASSETS

The following is a description of the Company's most significant property interests and related spending commitments (see Schedule I for a detailed breakdown):

Blue River Claims – (formerly known as the Upper Fir, Verity and Fir Claims)

The Company has a 100% interest in its Blue River claims, located in the Blue River region of the Kamloops Mining District of B.C., Canada, all of which were acquired by staking.

Eldor Claims

The Company acquired, by staking and a purchase agreement, a 100% interest in the Eldor Carbonatite Complex, located in the Labrador Trough area of Quebec, Canada. During the year ended October 31, 2007, the Company purchased 8 mineral claims from Virginia Mines Inc. ("Virginia Mines"), which cover a portion of the Eldor Carbonatite. These claims are adjacent to the approximately 88 claims staked by the Company. The Company currently has 244 claims covering 11,475 hectares.

Virginia Mines retains a 1% net smelter royalty on the 8 claims purchased from them. As well, 5 of the 8 claims are subject to an underlying 5% net profit royalty, which can be purchased for \$500,000.

On January 11, 2018, the Company entered into an exploration earn-in agreement with Saville Resources Inc. ("Saville") on the Eldor Niobium claims, known as the Niobium Claim Group Property. Under the exploration earn-in agreement, Saville has agreed to perform \$5,000,000 of work on the claims over a five-year period to earn a 75% interest in the claims. The Company received a cash payment of \$25,000 upon signing (received) and a cash payment of \$225,000 (received) following Exchange approval on October 11, 2018. The Company will retain a 2% Net Smelter Royalty (NSR) on production from some of the claims with a 1% NSR buyback for \$1,000,000, and a 1% NSR on the claims that are already subject to royalties. On February 14, 2023, the Company announced the extension of the Earn-In agreement with Saville Resources Inc. on the Company's Niobium Claim Group Property in Quebec for an additional one year.

8. SHARE CAPITAL

- a) Authorized: Unlimited common shares with no par value.
- b) Issued and outstanding: The total issued and outstanding shares of the Company total 99,846,805 as at July 31, 2023 (October 31, 2022: 91,654,630).

During the nine months ended July 31, 2023:

On December 19, 2022, the Company completed a non-brokered private placement, issuing 8,192,175 units (each, a "Unit") at a price of \$0.16 per Unit for gross proceeds of \$1,310,748 (the "Offering"). Each Unit consists of one common share of the Company (each, a "Share") and one common share purchase warrant (each, a "Warrant"), with each Warrant entitling the holder to purchase one Share at a price of \$0.25 per Share for a period of three (3) years from closing of the Offering (the "Closing"). The Company paid cash finder's fees of \$2,688 and issued 16,800 finder's warrants (each, a Finder's Warrant) to certain finders in connection with the Offering. The Finder's Warrants have the same terms and conditions as the Warrants. All securities issued in connection with the Offering will be subject to a statutory hold period expiring four months and one day after closing of the Offering.

11. RELATED PARTY TRANSACTIONS - continued

- (a) Dahrouge Geological Consulting provides geological services to the Company. Dahrouge is controlled by a director of the Company, Jody Dahrouge.
- (b) Zimtu Capital Corp. is a company with common directors and management. Zimtu provides key management services to the Company.
- (c) Dr. Axel Hoppe is a director of the Company.

* Key management includes those persons having authority and responsibility for planning, directing and controlling the activities of the Company, directly or indirectly, including the Company's executive officers and certain members of its Board of Directors.

The terms and conditions of these transactions with key management and their related parties were no more favourable than those available, or which might reasonably be expected to be available, or similar transactions to non-key management related entities on an arm's length basis.

These transactions are in the normal course of operations and have been valued in these financial statements at the exchange amount, which is the amount of consideration established and agreed to by the related parties. The amounts due to related parties are unsecured, non-interest bearing, and have no specific terms of repayment.

12. FINANCIAL INSTRUMENTS

The Company's risk management policies are established to identify and analyze the risks faced by the Company, to set appropriate risk limits and controls, and to monitor risks and adherence to market conditions and the Company's activities. The Company has exposure to credit risk, liquidity risk and market risk as a result of its use of financial instruments. This note presents information about the Company's exposure to each of the above risks and the Company's objectives, policies and processes for measuring and managing these risks. Further quantitative disclosures are included throughout these financial statements.

The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The Board has implemented and monitors compliance with risk management policies as set out herein.

a) Credit Risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations. The Company's cash and short-term investments are subject to credit risk for a maximum of the amounts shown on the statements of financial position. The Company monitors its credit risk management practices continuously to evaluate their effectiveness.

At July 31, 2023, the Company held cash of \$106,804 (October 31, 2022: \$513,793) and short-term investments of \$23,000 (October 31, 2022: \$23,000) with Canadian chartered banks.

The Company mitigates credit risk on these financial instruments by adhering to its investment policy that outlines credit risk parameters and concentration limits.

12. FINANCIAL INSTRUMENTS - continued

b) Liquidity Risk

Liquidity risk is the risk that the Company will incur difficulties meeting its financial obligations as they are due. The Company's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions without incurring unacceptable losses or risking harm to the Company's reputation.

As at July 31, 2023, the Company has total current liabilities of \$1,203,309 (October 31, 2022: \$1,474,962). Management intends to meet these obligations by raising funds through future financings.

c) Market Risk

Market risk consists of currency risk, commodity price risk and interest rate risk. The objective of market risk management is to manage and control market risk exposures within acceptable limits, while maximizing returns. The Company's marketable securities and investment in asset-backed commercial paper are subject to market risk.

i) Currency Risk

Foreign currency exchange rate risk is the risk that the fair value or future cash flows will fluctuate as a result of changes in foreign exchange rates. Although the Company is in the exploration stage and has not yet developed commercial mineral interests, the underlying commodity price for minerals is impacted by changes in the exchange rate between the Canadian and United States dollar. As all of the Company's transactions are denominated in Canadian dollars, the Company is not significantly exposed to foreign currency exchange risk at this time.

ii) Commodity Price Risk

Commodity price risk is the risk that the fair value of future cash flows will fluctuate as a result of changes in commodity prices. Commodity prices for minerals are impacted by world economic events that dictate the levels of supply and demand as well as the relationship between the Canadian and United States dollar, as outlined above. As the Company has not yet developed commercial mineral interests, it is not exposed to commodity price risk at this time.

iii) Interest Rate Risk

Interest rate risk is the risk that future cash flows will fluctuate as a result of changes in market interest rates. The Company invests part of the cash balance in a variable rate GIC. The exposure to interest rate risk, however, is limited due to the short-term nature of the GIC.

d) Fair Value

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

- Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3 – Inputs that are not based on observable market data.

Short-term investments	\$ 23,000	-	-
Marketable securities	8,985	-	-
	\$ 31,985	\$ -	\$ -

e) Capital Management

Capital is comprised of the Company's shareholders' equity and any debt it may issue. As at July 31, 2023, the Company's shareholders' equity was \$72,206,781 (October 31, 2022: \$71,591,426). The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern and to maintain a flexible capital structure which will allow it to pursue the exploration of its mineral properties. Therefore, the Company monitors the level of risk incurred in its mineral property expenditures relative to its capital structure which is comprised of working capital and shareholders' equity.

The Company monitors its capital structure and makes adjustments in light of changes in economic conditions and the risk characteristics of the underlying assets. In order to facilitate the management of capital and the exploration of its mineral properties, the Company prepares annual expenditure budgets which are updated as necessary and are reviewed and periodically approved by the Company's Board of Directors. To maintain or adjust the capital structure, the Company may issue new equity if available on favourable terms, option its mineral properties for cash and/or expenditure commitments from optionees, enter into joint venture arrangements, or dispose of mineral properties. The Company is not subject to any externally imposed capital requirements and there were no changes in the Company's approach to capital management during the year.

13. NON-CASH TRANSACTIONS

The following transactions have been excluded from the statement of cash flows:

During the nine months ended July 31, 2023:

14. LIABILITY AND INCOME TAX EFFECT ON FLOW-THROUGH SHARES

Funds raised through the issuance of flow-through shares are required to be expended on qualified Canadian mineral exploration expenditures, as defined pursuant to Canadian income tax legislation. The flow-through gross proceeds, less the qualified expenditures made to date, represent the funds received from flow-through share issuances that have not been spent.

On December 21, 2021, the Company issued 8,641,429 common shares on a “flow-through” basis at a price of \$0.28 per Share for gross proceeds of \$2,419,600. The flow-through proceeds were renounced under the Look-back Rule on December 31, 2021. At December 31, 2022, the Company has incurred \$2,419,600 qualified expenditures.

As at December 31, 2022, all flow-through expenditures have been incurred.
